ISW's experience and expertise in collaboration and social business can empower your people inside and outside your organisation to connect, collaborate, and innovate. Transform your organisation to become more competitive and drive real business results.

SOCIAL BUSINESS

Smarter businesses tap into their employees, customers, and partners, to leverage expertise and innovation. They integrate social collaboration into their strategies, operations, and processes resulting in efficiencies, problem solving, and new opportunities making them more competitive and successful.

ELECTRONIC FORMS

Taking paper processes and forms and creating fully featured electronic applications will improve efficiency, customer service, and time to value. Many organisations have manual forms that can be quickly web enabled delivering return on investment thru reduced manual process, reduced error rates and faster transaction times, enhanced compliance and security, and reduced environmental impact.

MESSAGING

Providing your users with security rich messaging and unified communications will create a more effective workforce. Add Social Business to the mix and you will be able to leverage your networks expertise and innovation in the context of your messaging environments.

BUSINESS PROCESS

Automating workflows enable organisations to perform business processes more quickly and accurately with clear, automated steps. Using simple and flexible development tools, agile organisations can quickly create, update, and deploy workflow applications across desktop, web, and mobile users.
