Boost team software development with Rational Jazz

ISW is pleased to present our latest Ignition offering: ISW Ignition for IBM Rational Jazz. Ignition for Jazz is a quick start program designed to accelerate your adoption of the Jazz platform and transform your software development by making it more collaborative, productive and transparent.

Rational Jazz is a technology platform specifically designed for open, collaborative software development. Jazz is designed to transform the way people work together to build software, by enabling better collaboration amongst team members, improving efficiency by automating repetitive tasks and delivering real-time insight into the health and status of projects to help teams make better, more informed decisions.

What's Great About Rational Jazz?

The Jazz platform is built on open standards and provides an architecture for seamlessly integrating a diverse collection of tools to address the specific needs of all team members across the software development lifecycle.

Jazz provides a set of shared services, which implement generic cross-tool capabilities including social networking capabilities for "in-context" collaboration, automation of individual and team workflows across the software lifecycle and real-time visibility of fact-based project metrics via dashboards and reports.

What Is Ignition?

ISW Ignition is a series of programs that are allowing businesses to implement key IBM software into their operations faster, limiting the often large up-front infrastructure investment.

ISW has developed Ignition as a cost effective way for businesses to fully evaluate the benefits of Rational Jazz products without incurring significant costs and time delays.

Implementing Jazz through this program gives organisations a platform to explore the capabilities of the Rational portfolio of software with full support from ISW's expert team. And if you decide to embrace the Jazz platform and invest in IBM Rational software, then all the hard work has already been done!

Jazz Products For Your Ignition

Three products from the IBM Rational range are offered as part of ISW's Ignition for Jazz. You can select one, two or all of the products to begin your Ignition. But of course, there is always the option to expand your investment at a later date.

Rational Requirements Composer helps teams define and validate project requirements. By providing a rich set of elicitation tools, Requirement Composer allows analysts to capture and link requirements documents, use cases, story boards, business processes, screen flows and mock-ups, business rules and more, to bridge the "information islands" that would otherwise exist.

Rational Team Concert is a collaborative work environment for Developers, Architects and Project Managers. It addresses the need to deliver high-quality software despite fewer resources and geographic dispersion often creating barriers to optimal results. Features include work item management (e.g. Defects / Changes), source control, build management and project planning.

Rational Quality Manager is a collaborative, web-based test management solution. It provides a customisable, role-driven solution for test planning, creation, and execution as well as workflow control, tracking, and end-to-end traceability.

Offer Details

Standard Ignition

- You choice of Requirements Composer, Team Concert, or Quality Manager
- 48 hr turnkey server installation preconfigured for optimal performance
- On premise or cloud offering (with 2 months free hosting)
- Initial 1/2 day Training & Enablement session
- Tool Template Selection
- Selection of artefacts to import
- Limited customisation of processes and fields

Cost \$6,000 +GST One time fee

Enterprise Ignition

- Combintation of multiple of the above Rational Jazz products
- Additional 1 day Training & Enablement session
- Integration between tools & Project Structure

Cost \$10,000 +GST One time fee

Options (Priced according to specific needs)

- Integration with other current installed software versions
- Additional Classroom based training with official IBM courses
- Regular ongoing on-site mentoring & developer enablement sessions

Licensing

There are no license fees associated with the ISW Ignition for Rational Jazz. Effectively you are conducting an evaluation under the IBM International License Agreement for Evaluation of Programs. We will provide you with a copy of this agreement for your acceptance.

At the completion of the Ignition program, continued use of Rational Jazz will require software licensing. ISW will work with you to ensure you get the best pricing available.

Availability

ISW's Ignition for Rational Jazz program is **available now!**

What happens once we are accelerating!

Once you have completed the proof of concept period, ISW is confident you will understand the capabilities of Rational Jazz and how it can help you rejuvenate your software development processes and outcomes.

ISW can then either assist you with migrating your environment to your own infrastructure or alternatively we can continue to host Rational Jazz for you on an ongoing basis.

How Do You Start Your Engines!

To get started today all you need to do is contact ISW and schedule your Ignition! We will meet with you and answer any questions you might have to make sure you are accelerating your proof of concept faster than Michael Schumacher!
